

# 60904 Marklin High-Efficiency Propulsion Conversion Kit

**Brand:** MARKLIN  
**Product Code:** 60904\_Märklin  
**Availability:** 2

**Price: Fr. 139.52**

**Ex Tax: Fr. 129.06**

## Short Description

60904 Genuine Marklin High-Efficiency Propulsion Conversion Kit

## Description

This kit consists of a locomotive decoder, a five-pole, high-efficiency motor and installation hardware for converting certain older Märklin H0 locomotives with the flat commutator motor to digital high-efficiency propulsion. The electronic circuit in this kit has 4 controllable functions (headlights from "function", smoke generator and Telex couplers, for example, from "f1" and "f2", minimal setting for the acceleration and braking delay from "f4"). The Control Unit (no. 6021) must be used as the central unit to control functions "f1", "f2" and "f4". Adjustable maximum speed. Adjustable acceleration and braking delay. 80 digital addresses can be set. In conventional operation with AC power the functions "function" and "f1" are turned on. Information about the 60904 and 60903 Products: We differentiate roughly 2 different types of motors among the universal current motors used with Märklin H0: The newer drum-style commutator motor and the flat commutator motor that used to be the standard motor. The easiest way to tell the two types of motors apart is by the type of brushes they use. Drum-style commutator motors have 2 carbon brushes, while the flat commutator motor has a carbon brush and a copper mesh brush (spare part number 600300). The familiar 60901 conversion kit can be used for drum-style motors. With the flat commutator motor there are a number of variations due to different armature diameters and brush plates. The 60904 or 60903 conversion kit can therefore only be used for

certain models.

## Specifications

The model	
Digital command system	Marklin (Motorola)
Suitable for	Older Marklin locomotives with flat commutator motor
